

**Alzheimers: A slowly
progressing, but
devastating disease.**

Z CARE

Alzheimers:

A slowly progressing, but devastating disease.

Alzheimer's is a type of dementia that affects an **individual's memory**.

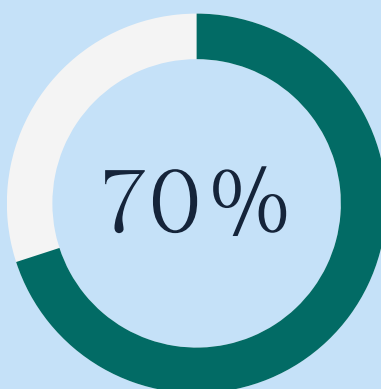

The sooner an individual gets a diagnosis, the sooner they can begin treatment.

Early signs of Alzheimer's

- You forget things more often
- You miss appointments or social events.
- You have trouble following a conversation.

If you have MCI, you also may experience:

1. Depression
2. Anxiety
3. A short temper and aggression
4. A lack of interest

Alzheimer's disease is the most common form of dementia

Currently, more than 55 million people live with dementia and there are nearly 10 million new cases every year.

Z CARE

Living well with Alzheimer's Disease

If you've been diagnosed with Alzheimer's, you probably feel overwhelmed and unsure of what the future holds for you.

We are here to help you by providing Z CARE mobile app that mainly benefit three main users (patient, care giver, physicians):

1. **patient**: enhancing daily routine
2. **care giver**: Observing and caring for the patient
3. **physicians** : early diagnose by using AI

To slow the progression of the disease as much as possible

Z CARE IS HERE FOR YOU
